

psuedoephedrine sulphate), reproterol hydrochloride, rimiterol hydrobromide, ritodrine hydrochloride, salmeterol xinafoate, terbutaline sulphate, tretoquinol hydrate and tulobuterol hydrochloride.

36. (New) The method according to claim 26, wherein the anti-inflammatory agent is selected from the group consisting of a corticosteroid, antihistamine (H_1 receptor antagonists), xanthines and methylxanthines, anticholinergic agents (antimuscarinic agents), and phosphodiesterase inhibitors.

Remarks

In the Office Action dated January 8, 2003, the Examiner requested Applicants to elect single species.

In response, Applicants elect the compounds of claim 5. Applicants have canceled claims 1-4 and 6-22 and have added new claims 23-36. Support for the newly added claims can be found in the specification on pages 400-403, 406, and 407.

More specifically, Applicants provisionally elect to prosecute the species of formula

without traverse.

Respectfully submitted,

Sherry M. Knowles
